Application/Control Number: 10/798,897

Art Unit: 3754

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Page 2

2. Claim 18, 20, 21, 23, 56 and 57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cramer 6,039,827 in view of Adams 2,961,130. Cramer discloses a chemical feed system that could be used in conjunction with a foam dispenser as claimed and as generally noted on column 1, lines 15-22, including a motor attached to a drive shaft 69, a pump unit 10, 12, and a drive transmission system that includes a first magnetic coupling member 54 driven by the motor 68, a second magnetic coupling member 50 driving the pump and an intermediate shroud or can 52 that forms a chemical reception cavity that receives pumped fluid inside the can or shroud as disclosed on column 5, lines 39-45, wherein the chemical in the shroud can be from the isocyanate group of chemicals as disclosed on column 9, lines 16-24, and one of ordinary skill in the art would have considered it obvious to orient the system either horizontally or vertically since the motor and pump assembly will function equally well in either orientation. In regard to claim 21, figure 2 shows a threaded aperture in the coupling that attaches to the end of motor shaft 68 which aperture receives the bolts holding 66 to the motor shaft 68. Consequently, Cramer discloses a chemical feed system substantially as claimed but does not disclose an inlet filter. However, Adams teaches another chemical feed system having a pump 19 with an inlet filter 25 for the purpose of ensuring impurities do not enter the pump. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide

Application/Control Number: 10/798,897 Page 3

Art Unit: 3754

the system of Cramer with an inlet filter as, for example, taught by Adams in order to ensure impurities do not enter the pump.

3. Claims 36 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Bezaire et al. 6,315,161. Bezaire discloses a chemical feed system including a pump 130 with inlet and outlet conduits and valves 150, 152, 154 as disclosed on column 11, lines 33-45, feed line heaters 168, and a dispenser 12.

- 4. In regard to the claims, Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
- 5. Claim 25 is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Casimer Jacyna whose telephone number is 571-272-4889. The examiner can normally be reached on Mon. thru Fri. 9AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on 571-272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
